

Solution Requirements

Date	26 June 2026
Team ID	
Project Name	AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	<i>Users can securely register and log in using email and password.</i>	High
2	Authorization levels	<i>Users can access only their own financial data and AI recommendations.</i>	High
3	External interfaces	<i>Integrates with AI services, financial APIs, and a database for storing</i>	High

		<i>user information.</i>	
4	Transactions processing	<i>Processes user financial details to generate personalized debt repayment plans and budget analysis.</i>	High
5	Reporting	<i>Generates financial health reports, debt analysis, repayment plans, and spending summaries.</i>	High
6	Business rules, etc.	<i>AI recommends repayment strategies based on income, expenses, debt amount, and financial goals.</i>	High
7	Compliance to laws or regulations	<i>Protects user financial information by following data privacy and security best practices.</i>	Medium
8	Other	<i>AI chatbot provides financial guidance, budgeting tips, and debt recovery suggestions.</i>	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	<i>The platform should quickly analyze financial data and generate recommendations.</i>	<i>Response time < 3 seconds</i>
2	Scalability	<i>The system should support increasing numbers of users without performance degradation.</i>	<i>Supports 5,000+ users</i>
3	Security & Data Privacy	<i>Encrypt user data and ensure secure authentication and storage.</i>	<i>AES-256 encryption, HTTPS</i>
4	Reliability & Availability	<i>The platform should be available with minimal downtime.</i>	<i>99.9% uptime</i>
5	Usability & Accessibility	<i>The interface should be simple, responsive, and easy to use across devices.</i>	<i>Responsive UI with intuitive navigation</i>
6	Other	<i>The system should be maintainable and easy to update with new AI models and features.</i>	<i>Modular and scalable architecture</i>
