

Technology Stack

Date	26 June 2026
Team ID	
Project Name	AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Detail

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	<i>HTML, CSS, JavaScript, Bootstrap</i>	<i>Provides a responsive, interactive, and user-friendly interface for financial management.</i>

2	Backend / Server-Side	<i>Python, Flask</i>	<i>Handles business logic, AI processing, and communication between the frontend and database.</i>
3	Database / Data Storage	<i>SQLite</i>	<i>Stores user accounts, financial records, debt details, and transaction history securely.</i>
4	Cloud / Hosting / Deployment	<i>Local Flask Server</i>	<i>Hosts and deploys the application for secure and reliable access.</i>
5	Version Control & CI/CD	<i>Git & GitHub</i>	<i>Enables version control, team collaboration, and source code management.</i>
6	Third-Party APIs / Other Tools	<i>Google Gemini API, Pandas, NumPy, Matplotlib</i>	<i>Gemini API provides AI-powered financial guidance, while Pandas, NumPy, and Matplotlib support financial data analysis and visualization.</i>
