

Scalability & Future Plan

Date	10 July 2026
Team ID	
Project Name	AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state, ensuring long-term viability and impact.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Uses SQLite database, which is suitable for small-scale applications but not high user traffic.	Limits scalability and concurrent user handling.	High
2	AI recommendations depend on an active internet connection and Google Gemini API availability.	AI features may be unavailable during network or API outages.	Medium
3	Currently available only as a web application.	Users cannot access the platform through dedicated mobile applications.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Suitable for a limited number of concurrent users.	Deploy using cloud services with load balancing to support larger user traffic.
2	Data Storage	SQLite database for local storage.	Migrate to PostgreSQL or MySQL for improved scalability and reliability.
3	Performance	Optimized for development and moderate workloads.	Implement caching, asynchronous processing, and API optimization to improve response time.
4	Security	Basic authentication and secure API key management	Add JWT authentication, role-based access control, HTTPS, and data encryption for enhanced security.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Mobile application, cloud deployment, and real-time notifications.	Next 3-6 Months	Improve accessibility and user engagement.
Phase 3	Integration with banking APIs, credit score analysis, and automated financial tracking.	Next 6-12 Months	Provide more accurate financial insights and personalized recommendations.
Phase 4	Predictive AI analytics, multilingual support, chatbot assistance, and advanced financial planning tools.	Beyond 12 Months	Create a comprehensive AI-powered financial management ecosystem with wider user adoption.
