

Project Initialization and Planning Phase

Date	29 June 2026
Team ID	
Project Title	AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposed solution aims to help individuals overcome financial challenges through an AI-powered platform that provides personalized debt analysis, budgeting assistance, repayment planning, and intelligent financial guidance. By leveraging Artificial Intelligence and data-driven insights, the platform enables users to make informed financial decisions, reduce debt, and improve long-term financial stability.

Project Overview	
Objective	Develop an AI-powered platform that analyzes users' financial data and provides personalized debt repayment strategies, budgeting support, financial health assessments, and AI-based financial guidance.
Scope	The project offers an integrated financial management solution that includes debt analysis, expense tracking, budget planning, AI chatbot assistance, and financial recovery recommendations to help users achieve financial stability.
Problem Statement	
Description	Many individuals struggle to manage multiple debts, control expenses, and create effective repayment plans due to limited financial knowledge and the lack of personalized financial guidance. Existing financial applications often provide generic advice that does not suit individual financial situations.
Impact	Addressing these challenges helps users reduce financial stress, improve budgeting habits, make informed financial decisions, and achieve long-term financial stability through AI-driven recommendations.
Proposed Solution	
Approach	Develop an AI-powered financial recovery platform that collects users' financial information, analyzes their financial health using AI, generates personalized debt repayment plans, monitors expenses and budgets, and provides financial guidance through an AI chatbot.
Key Features	- AI-powered financial health assessment. - Personalized debt repayment planning. - Budget and expense tracking.

	- AI chatbot for financial guidance. - Financial insights and recovery recommendations. - Interactive dashboard with financial reports.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU for AI processing and application execution	Intel Core i5/Ryzen 5 or higher
Memory	RAM	8 GB
Storage	Storage for application, database, and logs	256 GB SSD or higher
Software		
Frameworks	Backend Framework	Flask
Libraries	AI & Data Processing Libraries	Google Gemini API, Pandas, NumPy, Matplotlib
Development Environment	IDE	Visual Studio Code / PyCharm
Data		
Data	User financial information including income, expenses, debts, savings, and budgeting records	Secure user-generated financial data stored in SQLite
